Section 2 Coding conventions	9
Section 3 Index entries which refer to notes	10
Section 4 Summary of Structure	13
Alphabetical index for coding occupation	14 - 275

Introduction

This index is to help you to classify job titles for the purpose of completing monitoring returns to the Equality Commission for Northern Ireland.

IT IS TO BE USED FOR MONITORING DUE ON OR AFTER 1ST JANUARY 2013.

When you are completing your monitoring returns you have to show how many of your employees fall into each of the nine major groups. This index lists, in alphabetical order, a large number of job titles beside which is the appropriate major group number (in the range 1 to 9)

Detailed instructions are included on the next pages, however when using this index you should follow the following four steps:

1. Make sure each of your employees has an appropriate job title, based on the main operations or activities that they perform.
1. Look this up in the index and record the major group number shown
2. If you cannot find a particular job title, try looking for other possible alternative titles
3. If you are still unsuccessful, contact the Commission for further assistance

It is recommended you read the accompanying notes before using this index to familiarize yourself with the process involved.

In deciding the major group into which any job falls, the key factor is what the person actually does and not the activity of the establishment in which they work.

This publication is also available as a searchable database – CasCOT.

June 2012

Section 1: Notes on Using This Index

1.1 Indexing word

Job titles are arranged **alphabetically** under **indexing** words. The **indexing** word is usually the word which describes the job. However some indexing words are very general terms which give no indication of the work being performed, such as:

Boy	Hand	Woman
Employee	Man	Worker
Girl	Lad	Workman

1.2 Equivalent words

The feminine form of a job title is not indexed unless it is very common or its coding is different from the coding of the masculine form, so actor is in the index but not actress. Similarly, use index entries listed as man for 'woman' (where there is no index entry for **woman**), and 'person'.

1.3 Job titles

Sometimes a job title is just a single word which links exactly to an index entry and therefore is simple to code.

3 Actor
2 Solicitor

The indexing word is rarely sufficient to enable the job title to be correctly coded. Frequently an indexing word is made specific by the use of a qualifying term, for example to code, 'Brass turner' use the indexing word 'Turner' and the qualifying word 'brass'.

1.4 Reverse word order

The entries in the index generally appear in reverse word order, for example: 'Billiard table cushion maker' will be found under **8** Maker, cushion, table, billiard

1.5 Qualifying terms

In most cases the job title is made specific by words which are called **qualifying terms**. There are occupational, industrial and additional qualifying terms.

1.6 Occupational qualifying terms

Words shown separated from the indexing word by a comma are called **occupational qualifying terms** and **must** precede the indexing word in the job title being coded. For example, use the index entry **3** Adviser, careers to code 'Careers adviser'

Occupational qualifying terms are indexed in reverse word order, for example the job title 'Medical laboratory scientific officer' is indexed as: **2** Officer, scientific, laboratory, medical

A job title may contain a further qualifying word that is not listed in the index. For example, there is no index entry 'Controller, depot, freight' but the job title 'Freight depot controller' is coded using the index entry: **4** Controller, depot.

Similarly, 'White clay modeller' is coded from the index entry: **5** Modeller, clay and 'Boot buckler' is coded from the index entry: **8** Buckler

It is important to work in the order of the words. For example 'Sales office manager' must be coded from: **1** Manager, office **NOT** **1** Manager, sales

Sometimes a job title is recorded with the indexing word written before the occupational qualifying term, for example 'Controller purchasing'. Where no other words are recorded in the job title, the corresponding index entry can be used, for this example: **3** Controller, purchasing

1.7 Compound words

For compound words, such as 'Caddymaster', where the last element is an indexing word, go to the list for that indexing word: **6** Master, caddy and 'Storekeeper' is indexed under **9** Keeper, store

Some very common terms have also been indexed in their natural word order, for example, 'Stockbroker' under letter **S** and 'Coastguard' under letter **C**.

1.8 Use of 'ad', 'and', 'at', 'de', 'for', 'in', 'of', 'on', 'the', 'to'

Some job titles may be qualified by a clause following the indexing word, for example: **2** Clerk of the court

Titles like these are indexed in their alphabetical position at the end of the list for the relevant indexing word, but before any hyphenated double-barrelled entries, for example: **3** Inspector of taxes is in the clause entries at the end of the Inspector list. These job titles are usually very specific so the index entries must be used with special care. For example, 'Council clerk' must **NOT** be coded from the index entry: **1** Clerk to the council

1.9 Double-barrelled job titles

Sometimes a job title is expressed as two titles connected by a hyphen. Commonly used hyphenated job titles are listed in the index at the end of the list for the first job title. Do not reverse the order of the words, so for example to code 'Loader-checker' go to the end of list for indexing word 'Loader' to find **9** Loader-checker

Do not use the second title in the pair which would lead to: **4** Checker-loader

The hyphen can be read as an oblique. For example, 'Receptionist/typist' is coded from: **4** Receptionist-typist

Where a double-barrelled job title does not appear in the index, look up the first title. For example 'Cataloguer-lister', is coded from: **4** Cataloguer

Only use the second title if the first is not in the index. For example, 'Pestman-fumigator' is coded from: **6** Fumigator

See also note 3

1.10 Industrial and additional qualifying terms

These qualifying terms can be more freely interpreted than the strict observance of occupational qualifying terms. They may be used where they are part of the job title, or where they can be inferred from it, or they may have been provided in answer to a question other than one asking for details of a person's job title. Some examples are shown in the notes which follow.

1.11 Industrial qualifying terms

Industrial qualifying terms are shown within brackets and in italics and can take the form of an industry or branch of industry in which the person works. The abbreviation 'mfr' is used to cover manufacturing, making, building and repairing.

The industrial qualifying term *food products mfr* does not include *flour confectionery mfr* or *sugar confectionery mfr*.

The industrial qualifying term *government* includes both government departments and government agencies.

An industrial qualifying term is used in the example, 'Tractor driver on a farm', which is coded from the index entry: **8** Driver, tractor (*agriculture*)

Similarly, the job title 'Furnaceman' . industry 'steelworks' is coded from the index entry: **8** Furnaceman (*metal trades*)

1.12 Additional qualifying terms

Sometimes the qualifying term is more easily stated in terms of the type of material worked with, the machinery used or the process involved. These additional qualifying terms enable a number of specific terms to be summarised in a more general word and are shown in the index within brackets. Two examples of additional qualifying terms are:

The job title 'Steel drawer' is be coded from the index entry: **8** Drawer (metal) because steel is a metal.

The job title "Gold leaf cutter' is coded from the index entry: **5** Cutter, leaf (precious metals) because gold is a precious metal.

Additional qualifying terms can also, in a few cases, take the form of professional qualifications to differentiate between occupations. Two examples are:

The job title 'Cost Accountant' has the following index entries:

- 2** Accountant, cost (qualified)
- 4** Accountant, cost

The job title 'Thermal Engineer' has the following index entries:

- 2** Engineer, thermal (professional)
- 5** Engineer, thermal

The coder is referred to the Engineer (professional) list so that any information on the professional specialism can be used to reach the appropriate occupation code. For example, for the job title 'Marine technical consultant' go to the index entry:

Consultant, technical - see *also* Engineer (professional) to use **2** Engineer (professional, marine)

1.13 Order of qualifying terms

The list for an indexing word may contain some or all types of qualifying terms. Use the qualifying terms in the order they are listed in the index: occupational, additional, industrial.

1.14 Default index entries

Where a code number appears against an indexing word, the indexing word is used as a **default** index entry.

The default index entry is used to code all job titles which include the indexing word but which cannot be coded from any of the index entries with occupational, additional, or industrial qualifying terms. The following examples explain the **default** convention.

The job title 'Cinema Cashier' is coded from the default index entry: **7** Cashier because 'cinema' is not in the list of occupational qualifying terms and none of the additional or industrial qualifying terms for indexing word 'cashier' relate to 'cinema'.

For job title 'School laboratory technician' the default index entry: **3** Technician, laboratory is used since none of the other index entries for 'laboratory technician' include the word 'school'.

In the same way, the job title 'Sales office manager' is coded from: **1** Manager, office because sales is not in the list of other index entries for 'office manager', the default entry is used.

As mentioned previously, the order of the words is significant. The index entry: **1** Manager, sales must **NOT** be used for 'Sales office manager'.

Another example of the use of a default code is the entry: **9** Cleaner There are several entries for the indexing word 'Cleaner' with occupational, additional and industrial qualifying terms.

The default entry is used when

- a) none of the qualifying terms apply, or,
- b) only the word 'Cleaner' has been recorded with **NO** other occupational, additional or industrial information.

The use of the default entry, as described in item b) above, does not apply when there is an 'nos' entry in the list for the indexing word, see 15.

1.15 Use of 'nos' - not otherwise specified

An index entry with nos listed as an occupational qualifying term is used more precisely than a default index entry. The abbreviation nos is used to denote that the index entry can only be used where the job title has been recorded without any other information to use as occupational, additional or industrial qualifying terms.

For example the list of index entries for Chemist has an nos entry and a default entry. The job title 'Pigment chemist' is coded using the default index entry: **2 Chemist** because the word 'pigment' does not appear in the occupational qualifying terms in the list for chemists.

The job title 'Chemist' working in the retail trade is coded using the index entry:
2 Chemist (retail trade)

The job title 'Chemist', with **no** other information, is coded using the index entry: **2 Chemist, nos**

1.16 Use of 'see.....' and 'see also.....'

Where the list for one indexing word can be used for another indexing word the coder is directed to 'see...' or 'see also...'. These referral statements are used in different ways.

For a job title that has alternative spellings, for example: Advisor - see Adviser

Where a job title is sufficiently similar in its coding to that of all, or some of the entries, for another job title, for example: Minder, machine - see Machinist

A pair of brackets indicates words enclosed by brackets, so only use that part of the list which starts at the end of the occupational qualifying terms, for example: Manager, section - see Manager () use the manager entries starting at Manager (catering)

The words 'see also..' appear where the coder must check the entries at that point in the index before going to the other list, for example:

- 1 Factor, estate (Scotland)
- 3 Factor, housing (Scotland: *local government*)
- 1 Factor, housing (Scotland)
- 1 Factor, motor
- Factor - see also Dealer

use the Dealer list only after checking the entries for Factor.

1.17 Abbreviations

It is common for some job titles to be abbreviated and these abbreviations are indexed at the beginning of each relevant letter, for example: **1 MEP** is the index entry for MEP (which is the abbreviation for Member of the European Parliament) and it is in the list of abbreviations at the beginning of letter **M**.

3 WPC is the index entry for WPC (which is the abbreviation for Woman Police Constable) and it is at the beginning of letter **W**.

Sometimes grades or qualifications are used as job titles and written as abbreviations. These are listed in the index.

For example: **5** T2B (*telecommunications*) for Technician grade 2B in the telecommunications industry, and **2** MPS for Member of the Pharmaceutical Society.

The abbreviations 'cnc' and 'nc' are occupational qualifying terms which stand for computer numerically controlled, and numerically controlled. They are most often used with job titles such as Press Setter, Machine Setter, Programmer and Operator.

1.18 Assistant, Deputy, Principal, etc.- as prefixes

Job titles prefixed by words which indicate a position in a hierarchy, for example, 'apprentice', 'assistant', 'chief', 'departmental', 'deputy', 'head', 'principal', 'trainee', 'under', are normally coded as though the prefix words were not present.

For example, the job title 'Deputy accounts manager' is coded from: **1** Manager, accounts.

The job title 'Assistant Funeral Director' is coded from: **6** Director, funeral

There are a few exceptions where the coding is altered by such a qualifying word and in those instances the complete title is indexed, for example:

2 Secretary, private, principal

4 Secretary, private

See note 3.1 for the conventional coding of certain apprentices and trainees, and 3.6 for terms used with Engineer.

19 Assistant, Deputy, Principal, etc - as indexing words

As well as prefixing a job title, 'assistant', 'deputy', and 'principal' can also be titles in their own right.

For example, in the job title 'Manager's assistant', assistant is the indexing word so this title is coded using the index entry: **4** Assistant, manager's

Similarly, 'Funeral director's assistant' is coded from: **6** Assistant, director's, funeral

1.20 Major organisation

Some of the entries in the index include the term *major organisation*, which is defined as a company or organisation that employs 500 or more persons.

In some data collections, for practical purposes, this is based on the number of employees at the workplace.

Section 2: Coding conventions

2.1 Conversion to job title

Occupation information is not always given as a job title and sometimes the response has to be converted before it can be found in the index. Verbs or parts of verbs are normally converted to nouns, **except in the following instances:**

- Banking
- Building
- Catering
- Engineering
- Printing

For example, 'engineering' is **not** converted to Engineer and 'banking' is **not** converted to Banker but descriptions such as 'packing' can be converted to 'Packer'.

Similarly convert 'inspection' to Inspector, 'repair' to Repairer and 'work' to Worker, except for 'shop work' and 'brick work'.

2.2 The Armed Forces and the Civil Service

Many members of the Armed Forces and, to a lesser extent the Civil Service, have jobs which are unique to those industrial sectors. The most common job titles for Forces personnel are included in the index, for example:

- Commander
- Corporal
- Sergeant

Where the specific term is not given, for members of the Armed Forces, if officer rank is known, code to **1**, otherwise code to **3**.

Similarly many terms used in the Civil Service will be found in the index. However where members of the Armed Forces and the Civil Service give job titles that equate to jobs found outside these organisations, for example, 'Vehicle mechanic', 'Radio operator', 'Statistician', use these titles to code the occupation, rather than rank or grade.

Section 3: Index entries which refer to notes

3.1 Apprentice/Graduate apprentice/ Management trainee/Trainee

All persons in training for an occupation or profession should be coded to the relevant occupation or profession for which they are training.

In cases where it is NOT possible to determine the occupation or profession for which they are in training, the following conventions apply for these specific cases:

- 'Management trainee' code **1**
- 'Graduate apprentice' code **2**
- 'Student apprentice' code **2**
- 'Apprentice', with no occupational qualifying terms where there is information on industry construction trades code **5**
- electrical trades code **5**
- engineering code **5**
- where there is **NO** information on industry code **5**

3.2 Foremen, Supervisors, and Team Leaders

Although the index includes lists for these job titles, for those responses that also include a specific job title, use the relevant index entry for that job title.

For example, the job title 'Foreman carpenter' is coded from index entry: **5** Carpenter

There are no index entries for foreman over particular groups of workers, so for example 'Foreman of labourers' is coded from the index entries for Labourer.

The job title 'Supervisor of telephonists' is coded from the index entry: **4** Telephonist

The following terms are regarded as synonymous with Supervisor **2**¹ or Foreman:

- Boss
- Chargehand
- Chargeman
- Gaffer
- Ganger
- Headman
- Overlooker
- Overseer

and also assistant foreman, assistant supervisor, etc.

All these job titles are indexed in their own right but to aid coding also refer to the index entries for Foreman.

¹ The term 'Supervisor' is not always a synonym for Foreman. For example when used in the context of supervising children with the job title 'Playground supervisor'.

3.3 Company Director/Director/Director of/ Managing Director

Directors with specific titles, for example, 'Sales director' are coded as shown in the index or from the list for Managers with occupational qualifying terms.

Where 'Company Director', 'Director', or 'Managing director' is recorded without any occupation qualifying terms code as follows:

- (a) if it is known that the person works for a major organisation, code to 1
- (b) if any industry information is available code from the Manager () entries.
- (c) if no other information is available code to 1.

3.4 Chairman

Apart from the industry of glass blowing, where chairman is a specific job title, a chairman is regarded as a company chairman and coded as a Company Director (see note 3.3).

3.5 Owner/Partner/Proprietor

The list for indexing word Owner is also used for Partner and Proprietor but where another job title is stated, code to that job title.

For example, 'Owner taxi driver' is coded from the index entry: 8 Driver, taxi

The job title 'Partner bookkeeper' is coded from the index entry: 4 Bookkeeper

The job title 'Proprietor and hairdresser' is coded from the index entry: 6 Hairdresser

Where no other job title is stated, refer to the index entries for Owner.

The term 'Supervisor' is not always a synonym for Foreman. For example when used in the context of supervising children with the job title 'Playground supervisor'.

3.6 Engineer

The job title engineer presents difficulty in coding because it is commonly used in a variety of circumstances. The index includes various job titles for specific engineers that may be used by both professional engineers (usually classified in Major group 2) and by those who are not regarded as professional within the classification. If the title to be coded is prefixed by the terms 'advisory', 'chief', 'chartered', 'consultant', 'design', 'development', 'principal', 'research', 'senior', it can be assumed that the person is a professional engineer. A list of professional specialisms is included at the end of the index entries for Engineer.

For example 'Chief aviation engineer' is coded from the index entry: 2 Engineer, aviation (professional).

Where there is only a single index entry that links to a professional unit group, that can be used, so for example, the job title 'Senior quality engineer' is coded from the index entry: 2 Engineer, quality

The job title 'Senior engineer in public health' is coded from the index entries: Engineer, senior. see Engineer (professional) which leads to 2 Engineer (professional, public health)

In cases of doubt, the person is regarded as nonprofessional.

There are a few industries in which the job titles 'Engineer' and 'Electrical engineer' are used in a specific sense so these industries are listed as industrial qualifying terms in the index entries for:

Engineer, nos

Engineer, electrical, nos

For example, where the job title 'Electrical engineer' is recorded with no other information, except that the person is working on merchant vessel Oil Mariner, it is coded from the index entry: 3 Engineer, electrical, nos (shipping)

3.7 Journeyman

The word 'journeyman' is ignored when it is used with another job title. For example, 'Bookbinder journeyman' is coded from: 5 Bookbinder

3.8 Leading hand

Where another job title is stated, code to that job title. For example, 'Leading hand precision engineer' is coded from: 5 Engineer, precision

Where no other job title is stated, refer to the index entries for Leading hand indexed as Hand, leading.

Section 4: Standard Occupational Classification 2010 (SOC2010)

Summary of Structure

The Standard occupational Classification consists of the following major groups:

- 1 Managers and Senior Officials
- 2 Professional Occupations
- 3 Associate Professional and Technical Occupations
- 4 Administrative and Secretarial Occupations
- 5 Skilled Trades Occupations
- 6 Personal Service Occupations
- 7 Sales and Customer Service Occupations
- 8 Process, Plant and machine Operatives
- 9 Elementary Occupations

This index lists various job titles. Beside each title is printed the number of a major group in the SOC2010. Where the job title of a person's employment is listed in this index that employment shall be classified as falling under the major group in the SOC2010 whose number is printed beside it.
